The production process, financial accounting, and cost accounting information requested below is necessary for the Department to better understand your company's operations, its products and production processes, and its financial and cost accounting practices. Therefore, you should provide complete narrative responses to each of the items listed below.

A. Products and Production Processes

Official Document: A-549-822 Barcode:3086063-06 REV. Admin Review 2/1/11 - 1/31/12
Provide a description of your company's production process for the merchandise under consideration. Your description should address each of the items 1 through 8 listed below.

- 1. Provide a description of your company's production facilities. If production of the merchandise under consideration takes place at more than one facility, identify each facility and describe the production activities that take place at each facility. Identify all products manufactured at each facility, including products not under consideration.**

ANSWER: MRG provided a general description of its production process in its Section A response. As noted in its Section A response, MRG produced all merchandise under consideration at one facility, but did hire external peeling houses during the POR to de-head, peel, de-vein, and de-tail some of MRG's fresh shrimp, after which the processed shrimp was transported to MRG for final processing into finished products. MRG accounted for the fees paid to these external peeling houses as part of its labor costs.

- 2. Provide a flowchart of the production process for the merchandise under consideration. Please supplement your flowchart with descriptions of each stage in the process.**

ANSWER: Exhibit A-14 of the Section A response contained HACCP plans for MRG's production process of merchandise under consideration. These plans provide flow charts for the production process and depict each stage in the process to produce each type of shrimp.

- 3. List all coproducts, byproducts, and scrap that result from producing the merchandise under consideration. Describe why your company considers these items to be coproducts, byproducts, or scrap.**
